HTML, CSS, JavaScript, NodeJS, React, Redux, SQL-Lite, REST, GraphQL, Python, PostgreSQL, Less/Sass, Flask, Django, Angular, Jest, SQL

Projects

ghsr-portfolio

Apr. 2020 to Current

BUILT WITH: HTML | CSS | JS | REACT

Independent project designed with intent to be a simple 1 stop shop about me.

- Folder/file structure was done with simplicity and reusability in mind.
- Includes a ticker, a summary of me and my work, as well as links for my Github, LinkedIn, Resume and a streamlined method to email me.

YELP-FEELERS

Oct. 2019 to Oct. 2019

BUILT WITH: HTML | CSS | JS | REACT | REDUX | NODE.JS | EXPRESS | KNEX | POSTGRESQL | PYTHON | JWT | YELP API

YELP FEELERS was also a cross-functional team project tasked with building an application that leveraged the YELP API to produce modified review results based on user sentiment analysis.

- Our team consisted of 8 students from different checkpoints of WEB and Data Science curriculum and were expected to complete this in 4 days.
- My responsibilities included Leading the project team as well as producing the BackEnd of the project.
- Utilized Node JS and Express to set up the server environment and API; used KNEX to translate JS to SQL and deploy the PostgreSQL Database; also used the API and JWT to validate client side user data sent to the Backend.

Chicago Array of Things

June 2019 to June 2019

BUILT WITH: HTML | CSS | JS | REACT | REDUX | NODE.JS | EXPRESS | KNEX | POSTGRESQL | PYTHON | AOT API

Chicago Array of Things was an ambitious project to allow users to visit our site to view preferred data collected by the Chicago AOT sensors.

- Our team of 9 students from different checkpoints of WEB and Data Science curriculum were expected to build this in 4 days!
- Solely responsible for working with the Back End to produce a Front End that included a Client side Authorization, Login, Registration and producing a Query interface for the user that would present a graph returned from the Back End / DS team linked to the chosen query.
