While I have spent more than 10 years as a mobility sales representative; my new passion and ambitions reside as a web developer that excels at my craft. I have spent several months primarily learning about HTML, CSS, JavaScript, REACT, REDUX, HOOKS, NODEJS, KNEX, SQL, SQLITE3, POSTGRES & more. I also have exposure to ANGULAR, MONGODB, DJANGO, PYTHON, SWIFT, & more. My goal is to find a place of employment where my passion for developing quality applications improves the quality of life & experiences for end users; increases value and I can continue to grow as a contributor with an equally strong, reciprocal team that share the same passion for life, people and developer work as I do.

WEB DEVELOPMENT
